Summary

Computer Science (AI & ML) undergraduate with hands-on experience in AI automation, intelligent agents, full-stack development. Currently working on an innovative project in the automation domain for which a research paper is published and a patent is being published in my name. Recognized as the best project of Karnataka. Interested in roles where I can apply technical and problem-solving skills to build intelligent systems and contribute to meaningful, high-impact technologies.

Education

Sahyadri College of Engineering & Management, Mangalore 2022–2026
B.E. in Computer Science Engineering (Artificial Intelligence and Machine Learning) CGPA: 8.72

Experience

Aarvath Mobitech Pvt Ltd Oct 2023 – Jul 2024
Web Developer Intern

- Developed and deployed a responsive MERN stack web application using React, Node.js, Express.js, and MongoDB, improving user engagement by 30%.
- Integrated RESTful APIs and collaborated using Git-based workflows in an Agile development environment.
- Troubleshoot application issues, deployment, and participated in Agile sprint planning and product demonstrations.

MRI Real Estate Software Jan 2026 – Jul 2026
QA Intern

- Performed functional and API testing for enterprise-scale real estate applications to ensure application reliability.
- Used API testing tools to validate data integrity, defect investigation and support end-to-end system validation.
- Collaborated with developers to perform root-cause analysis, debug issues, and verify software fixes.
- Contributed to Agile development cycles through test planning, regression testing, release validation, and defect tracking.

Skills

Programming: Python, JavaScript, C/C++, SQL, HTML/CSS, R

Frameworks: React.js, Node.js, Flask, Electron.js

DevOps: Git/GitHub, Linux (Ubuntu), REST APIs, Agile, Scrum, Debugging, Software Testing

AI & Automation: AI Agents, Multi-Agent Systems, Prompt Engineering, LLMs, MCP Servers, Automation Workflows

Databases: MongoDB, MySQL, SQLite

Data Science: Scikit-learn, Pandas, NumPy, Matplotlib

Tools: VS Code, Firebase, Postman, MS Office, Ubuntu

Projects

SIGMA OS

Developed an AI-powered desktop automation platform using local LLMs, LangChain, LangGraph, MCP servers, and multi-agent orchestration for intelligent desktop automation. Engineered agent workflows for intent interpretation, planning, and task execution, enabling 20+ automated system and file management operations while improving execution efficiency by 30% in simulated environments. Built and tested on Ubuntu with Git-based version control.

Winner: College & Dept Level Project Exhibition

Diabetic Meal Planner

Developed a personalized diabetic meal planner using K-Means Clustering, improving dietary adherence by 25% based on mock user feedback. Tailored meal plans using 100+ unique health metrics and nutritional profiles.

Winner: Department Level Project Exhibition

Startup Website (MERN Stack)

Built and deployed a MERN stack web application on Hostinger using React.js, Node.js and MongoDB. Integrated authentication, REST APIs, and deployment workflows while improving stakeholder engagement by 35%.

AI Timetable Generator

Created an automated scheduler using genetic algorithms with QtPy and SQLite, reducing manual scheduling time by 70% and supporting 100+ class allocations with conflict-free resolution.

AI Routing System for Logistics

Developed a multimodal logistics routing platform integrating road, rail, air, and sea transport using AI-based optimization models and geospatial algorithms to improve routing efficiency by 35% while reducing manual planning time by 60%.

Achievements

- Awarded as Karnataka's best project under AIML category by Govt of Karnataka at the KSCST program.
- 1st Place – College & Department Level Major Project Exhibition (2026)
- 2nd Place – College & Department Level Major Project Exhibition (2025)
- Published research paper in IEEE Xplore
- Participant – Smart India Hackathon
